

SEO · WORK COMPLETED

What we built on the website so Google can find you better

A short report for Rabab — Taghazout Cooking Class.
English and French pages, search titles, sitemap, and tracking.
Written in plain language. No ads copy-paste.

Prepared 13 September 2026

Website: www.taghazout-cooking-class.com

Languages now: English (/) and French (/fr)

For Rabab · Internal use

1. In one sentence

Guests can now book in English or French, and Google has two real pages: an English page and a French /fr page, each with its own title and description. We also fixed the sitemap so Google can crawl the site, and we connected bookings to Google Analytics.

This report is about work on the website. It is not a promise of page-1 ranking. Google still needs days or weeks to recrawl. You still need to request indexing in Search Console.

2. What is live on the website today

French pages

The language switch now opens real French URLs. French searchers can get a French title and description. Before, English and French shared one URL, so Google almost always showed English.

Page	English URL	French URL
Home	/	/fr
Packages	/packages	/fr/packages
Book	/book	/fr/book
Experiences	/experiences	/fr/experiences
Location	/ourstory/location	/fr/ourstory/location
Events	/events	/fr/events
FAQ	/faq-contact	/fr/faq-contact

Search titles Google should use

These titles are already on the live pages. Google may still show the old ones until it recrawls.

Page	English title	French title
Home	Cooking Class Taghazout, Tamraght & Agadir	Cours de cuisine Taghazout, Tamraght et Agadir
Packages	Cooking Class Packages — Taghazout from €65	Formules cours de cuisine à Taghazout dès 65 €
Book	Book a Cooking Class near Taghazout	Réserver un cours de cuisine près de Taghazout
Location	Location — Cooking Class near Taghazout, Tamraght & Agadir	Cours de cuisine près de Taghazout, Tamraght et Agadir
Experiences	Tajine, Rfissa & Bread Class in Taghazout	Cours tajine, rfissa et pain à Taghazout

3. Other website work (already live)

Sitemap fixed

Google's map of the site (sitemap.xml) was broken and returned an error. It now works and lists both English and French pages.

Three towns in the title

Home and location titles name Taghazout, Tamraght, and Agadir together, so people searching any of those towns can see you.

Share images (Open Graph)

Each main page now has its own photo when someone shares the link on WhatsApp, Instagram, or Facebook.

Saturday event marked for Google

The weekly Amazigh music evening (Saturday, 15:00–19:30, 80 €) is described in a format Google can read.

Packages marked for Google

The four offers (from 65 €, weekly event, private, Rabab at your villa) are described so Google can understand prices.

Breadcrumb trail

Inner pages tell Google the path (Home → Packages, and so on). This can show as a small trail under the search result.

Language tags (hreflang)

Each page tells Google: English lives here, French lives on /fr. That is how French descriptions can appear for French searches.

Honest review markup

We removed a fake "500 reviews" mark that was only in the hidden code. The site still shows 69 Google reviews on the page. Fake review numbers can get a site penalised.

Google Analytics on bookings

When someone finishes a booking, the website can send that booking to Google Analytics (GA4), so you can see which visits turn into guests.

Search Console

The site is connected to Google Search Console so we can see the real words people type.

4. Keywords from the research PDF

The separate file Taghazout-Cooking-Class-SEO-Keywords.pdf lists the English and French phrases people type. Those phrases are now written into the website code: English phrases on English pages, French phrases on /fr pages.

Putting keywords in a hidden list does not rank the site by itself. Google ranks from the title, the description, and the text guests can read. The keyword list is ready on the computer. It goes live with the next website publish.

English phrases included

cooking class taghazout · taghazout cooking class · cooking class tamraght · tamraght cooking class · cooking class agadir · cooking class near agadir · moroccan / berber / amazigh cooking class taghazout · tajine taghazout · rfissa taghazout · couscous cooking class taghazout · food in taghazout · things to do in taghazout besides surfing · berber experience with cooking class · private cooking class taghazout.

French phrases included

cours de cuisine taghazout / tamraght / agadir · atelier cuisine · cours de cuisine marocaine / berbère / amazigh · tajine, rfissa, msemen, couscous, amlou, pain berbère · expérience berbère avec cours de cuisine · activité taghazout hors surf · que faire à taghazout / tamraght · visite village berbère · excursion atlas.

We did not add “pick it cook it”, “date night cooking classes”, or “bbq class near me”. Those are another brand or searches that are not about Taghazout.

5. What you need to do (5 minutes)

Open Google Search Console. For each URL below, paste it and click Request indexing. This asks Google to recrawl sooner. It does not guarantee a new snippet the same day.

- <https://www.taghazout-cooking-class.com/>
- <https://www.taghazout-cooking-class.com/fr>
- <https://www.taghazout-cooking-class.com/packages>
- <https://www.taghazout-cooking-class.com/fr/packages>
- <https://www.taghazout-cooking-class.com/book>
- <https://www.taghazout-cooking-class.com/fr/book>
- <https://www.taghazout-cooking-class.com/experiences>
- <https://www.taghazout-cooking-class.com/fr/experiences>
- <https://www.taghazout-cooking-class.com/ourstory/location>
- <https://www.taghazout-cooking-class.com/fr/ourstory/location>

Also add this sitemap if it is not already in Search Console: <https://www.taghazout-cooking-class.com/sitemap.xml>

6. What this work will not do

It will not put you on page 1 overnight. French results will keep showing older English snippets until Google recrawls /fr. Bigger sites with years of French pages can still sit above you.

It does not replace Google Business Profile (Maps), reviews, or WhatsApp reply speed. Those still bring guests who search “near me” or browse the map.

It is not Google Ads. Ads are rent. This work is the shop you own. We should not turn on ads until Search Console and Analytics show the new pages being crawled.

7. How to check in 4 weeks

In Search Console → Performance: look at Queries and Countries. We want more impressions for “cooking class taghazout”, “cooking class tamraght”, “cours de cuisine taghazout”, and “expérience berbère avec cours de cuisine”, and a few clicks from France or French-language searches.

If you have questions, reply with a voice note. The keyword research PDF is a sister document — it lists the phrases. This PDF lists the work already done on the site.
